

DARING TECHNOLOGY INDUSTRY

01 OVERVIEW

Daring's team provides customer excellent products from designs to marketing.

02 HISTORY

Founded in 2010, Daring Technology Industrial Co., Ltd specializes in designing and manufacturing industrial fans for various applications, including electric vehicle chargers, automatic storage systems, air conditioning, machinery, medical equipment, servo motors, and the shipping industry. With a dedicated R&D team, we offer customized solutions, process improvements, and collaborate with research centers. Our fans undergo rigorous testing to meet environmental challenges like anti-gravity, water and oil resistance, and salty spray. Over the years, we've earned trust and reliability from our users.

03 Our Certification Seals

FOUR KEY ADVANTAGES

Outstanding Heat Dissipation Performance

Highly efficient heat dissipation technology ensures superior cooling performance, low-noise operation, reduced maintenance costs, and increased long-term value.

Use of Eco-friendly Materials

Manufactured with eco-friendly materials that comply with the strictest environmental standards, contributing to your company's environmental initiatives and promoting sustainable development.

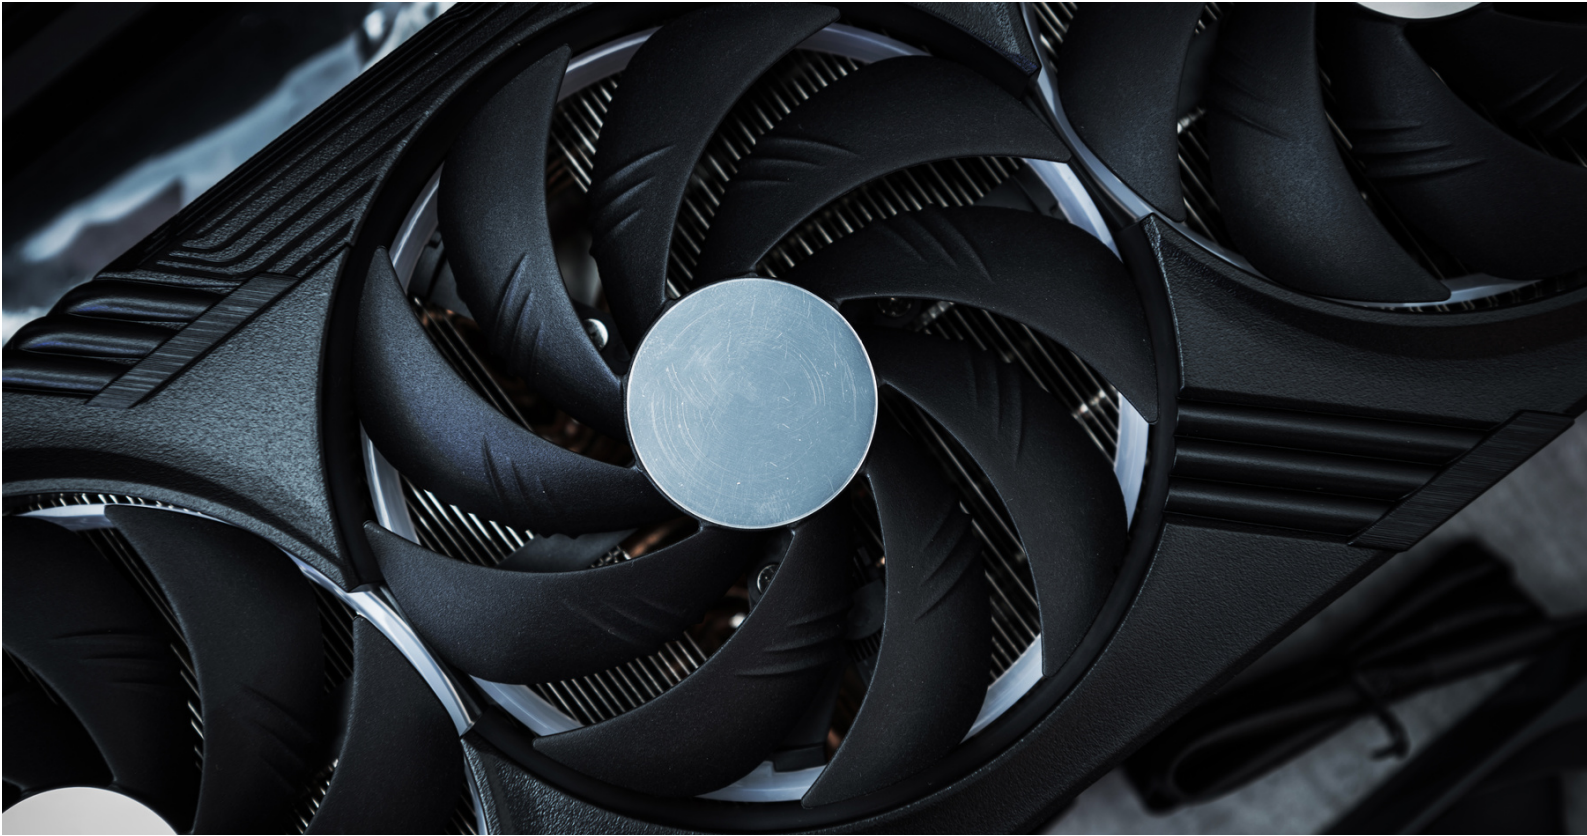

Sturdy and Durable

Premium materials and robust design ensure the durability of the fan, making it suitable for various harsh environments, enhancing equipment performance, and extending the overall lifespan.

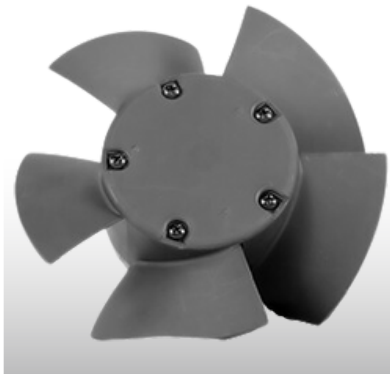

Space-Efficient

The compact design delivers outstanding performance, optimizing space utilization without compromising on heat dissipation efficiency, making it particularly suitable for environments with limited space.

Household Equipment

AC-NA14555-V2HBLP
Ø145x55 mm

EV charger

A15155
172x151x55 mm

Energy storage system

A28080-V2HBKS(S)
Ø280 x 160 mm

Data Center

C22076
Ø220x76 mm

Ware house Management System

C17065
Ø170x65 mm

HVAC

C22599
Ø225x99 mm
